DOWNLOAD SELECT AND SPEAK

Go to Google Store- <u>https://chrome.google.</u> <u>com/webstore/category/apps</u>

Choose Select & Speak

what *is* select and speak?

- Uses iSpeech's human sounding text to speech (TTS) to let you select text from almost any website and make it talk.
- Includes 43 iSpeech text to speech voices.
- Users can configure voice and speed options by changing the settings on the options page.

Note:

This Chrome extension sends the text that you select to iSpeech servers using your Internet connection as it is Cloud TTS service (aka SaaS or Software as a Service)

ALEX FOR OS X

- With Text to Speech, you can highlight any text, and Alex will read it aloud.
- Choose from other male or female voices to do the reading.
- Adjust the speaking rate.
- Choose from over 20 built-in languages.

The Alex Voice

Alex is the voice of Mac, and he uses advanced technologies to deliver natural-sounding speech. While most text-to-speech systems analyze and synthesize text one sentence at a time, OS X analyzes text a paragraph at a time to decipher the context of words more accurately. This helps Alex more closely match the nuances of how people really talk. He sounds so natural, he even pauses for a breath between long passages. So when Alex reads longer passages in books, articles, and news stories, you understand them more easily.

- Launch the Settings app from the Home screen of your iPhone or iPad.
- 2. Now tap on **General**.
- Scroll down and towards the bottom, tap on Accessibility.
- Tap on the Speak Selection option and turn it to On.
- You can further customize the speed at which your iPhone or iPad reads the text and the dialect it uses. Once you're done, just tap the Home button to return to the Home screen.

USE SPEAK SELECTION ON IPAD

- Launch the app containing the text you'd like your iPhone or iPad to speak back to you.
- Hold your finger down on the text you'd like it to read to pull up the copy/paste menu.
- Highlight the text and in the text edit popup, select **Speak**.
- Your iPhone or iPad will now speak the text back to you.
